

# ENSolutions for Healthcare

Euronovate group, leader in Digital Transformation, has focused all its effort and resources to provide the Healthcare industry with solutions to **accelerate the vaccination process** in order to be more efficient, fast and effective.

Our Solution offers two options:

## 1 Avoid the queues by starting the vaccination process remotely

- Patient access the documentation remotely.
- Use an Advanced Electronic Signature to sign the documentation.
- They sign all the requested papers directly from home with legal validity.

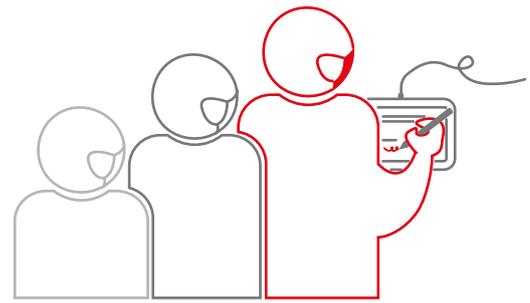

## 2 Advanced Electronic Signature at the vaccination point

- Patients arrive at the vaccination point.
- They sign the requested documentations with an Advanced Electronic Signature through our tablet **ENSIGN11**.

## Benefits of the Digital Signature in remote:

- **Identity Verification** through OTP with SMS or Email.
- **Document Integrity** through Time Stamp.
- **Secure** and protect patient data (GDPR compliant).
- **Agilize** the administrative processes.
- **Guarantee** the security of the documentation.
- **Reduction of the queues** and long waitings at the vaccination point.

## Benefits of the Digital Signature at vaccination points:

- **Easy access** to the patient files at any time, anywhere.
- **Secure** and protect patient data (GDPR compliant).
- **Optimize** the organizational processes.
- **Save time** in queueing.
- **Reduce costs** (paper and storage space).
- **Agilize** administrative processes.

*“Thanks to the integration of Euronovate Solutions to our vaccination points, we **reduced** the vaccination **queuing times** by **50%**, **smoothing the process**”.*
